## PRESS RELEASE

### TASK CONSTRUCTED OLIVER WOODS FACILITY CERTIFIED LEED GOLD

**FOR IMMEDIATE RELEASE - Burnaby, August 24, 2011:** TASK Construction Management today announced the TASK managed Oliver Woods Community Centre in Nanaimo, BC has just been certified as LEED Gold. The designation is part of an internationally recognized green building certification system that provides verification a building – in this case the Oliver Woods Community Centre, was designed and built using sustainable strategies for the efficient use of water and energy, indoor environmental quality, material and resource usage as well as innovation in building design and operations.

“We are extremely pleased with Oliver Woods' LEED Gold designation,” said John Hiebert, President and CEO of TASK Construction Management. “As a company, we are very environmentally aware of the impact construction as well as the ongoing operation of one facility can have. We strive to minimize environmental impact on every one of our projects – LEED or otherwise.”

TASK has successfully practiced construction management for over 22 years. The construction management form of project delivery is well suited to LEED and other environmental certification systems, as it allows for the development of sustainable design strategies from project inception through to delivery and ongoing maintenance.

“Environmentally responsible construction is integral to the success of the communities in which we work and live,” added Tony Niro, Vice President Business Development, TASK Construction Management. “We are proud to have contributed to the City of Nanaimo's development strategy and to have the skills on hand to continue to deliver responsible construction to communities across Western Canada.”

**MORE**

Among the many green building initiatives undertaken on the Oliver Woods facility, some of the more innovative were the use of re-cycled and re-manufactured wood for the gymnasium floors. The community centre grounds also featured a fish-bearing creek. To protect the creek as much as possible, TASK constructed a "living wall" – a free-standing wall covered in vegetation to frame the community centre on the creek-facing side of the property.

**ABOUT TASK CONSTRUCTION**

TASK Construction Management, an MC Group Company, has provided over 22 years of construction and project management services throughout Western Canada to private and publicly funded developers and building owners. Specializing in fast-track construction management techniques, TASK has won several industry and sectoral awards for excellence in project delivery.
